

Innovation & Business Intelligence Like You've Never Seen.

LienFinder™

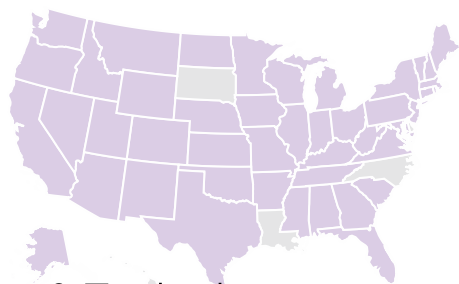

LienFinder™ is an online database that captures construction project data nationwide, from hundreds of recording offices daily. **Locate essential project information and avoid potential payment risks, through the review of national mechanic's lien activity.**

- obtain or confirm project information
- locate party information for the ladder of supply
- uncover potential payment risks on current & future projects
- monitor future lien activity on projects and parties

Documents include **nationally recorded mechanic's liens** and subsequent **amendments**.

LienFinder™ data base is growing.

1,383
